Chiropractic Radiographic Systems

CHIRO-X Chiropractic Radiographic Systems are highly refined for logical and efficient operation. This unique approach to system development simplifies radiographic examinations and assures that Quantum products meet the growing needs for chiropractic radiology.

QS-506 RADIOGRAPHIC TUBESTAND

Quantum's QS-500 Series tubestand is ideal for all chiropractic environments. The tubestand is easily positioned using the dual soft-grip handles. Fingertip controls permit easy access to multi-function lock release switches, including longitudinal, vertical and angulation. The handgrip also includes an easy-to-read angulation display for accurate indication of tube rotation and LED indicators to verify the SID.

QW-400 VERTICAL WALL FRAME

The Vertical Wall Frame is custom designed for the chiropractic profession. This full-length frame allows for complete spinal imaging without the need for patient re-positioning, as the image receptor is easily repositioned behind the patient, using Quantum's EZ-Glide hand control.

EZ-GLIDE HAND CONTROL

Featured on the Wall Frame & Wall Stand is designed to allow operator adjustment from a comfortable standing position with minimal effort

QUEST HF SERIES

The QUEST HF Series provides an innovative solution for today's challenges in radiographic imaging. Merging sophisticated technology and system architecture with a simple, menu-driven program, the design team at Quantum Medical Imaging has addressed the concerns of technologists and clinicians.

QW-420 "VERTI-Q" WALL STAND

Quantum's Vertical Wall Stand, VERTI-Q, is a stylized, single-column structure with an attractive receptor enclosure. The low-absorption front cover includes cassette centering lines for precise patient positioning.
